

Thinking of
Becoming a
Teacher?

Consider Educational Studies at NECC

If you want to become an elementary teacher (grades 1-6) or middle/high school teacher (grades 7-12), it makes sense to start at Northern Essex Community College. With the Educational Studies Program at NECC, you can:

- 1 Enroll in a state-approved associate degree program leading to teacher licensure,
- 2 Learn from professionals with extensive experience in schools and classrooms,
- 3 Get real-life field experience in the classroom every semester,
- 4 Gain the skills to become a mathematics, science, English, art, history, special education, or physical education/health teacher,
- 5 Save thousands of dollars on your degree when you transfer to earn your bachelor's degree!

Once you graduate, you can transfer to earn your bachelor's degree to become a teacher, or seek work immediately as a paraprofessional in the school system. If you are currently a paraprofessional, come to NECC to earn your degree – and increase your earnings!
